

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

1. (Previously presented) A method for providing digital images of a first resolution to a user comprising the steps of:
  - processing roll of film and digitizing images on said roll of film and forming said first resolution digital images;
  - recognizing a content identifier on said roll of film by analyzing said digital images, said content identifier providing information or instructions; and
  - transmitting said first resolution digital images to a service provider over a communication network, said service provider forwarding said first resolution digital images to a computer of a recipient over said communication network after forming a copy of each of said first resolution digital images in accordance with said instructions or said information, wherein said service provider storing said first resolution images for an ordering period after which said first resolution images are automatically transferred to the computer of said recipient and said stored high resolution images are converted to lower resolution images and added to the recipient's low resolution image collection at said service provider.
2. (Original) A method according to Claim 1 further comprising the step of:
  - said service provider storing said copy of each first resolution digital image for future access by the user and/or authorized third parties over said communication network.
3. (Previously presented) A method according to Claim 1 further comprising the steps of:
  - said service provider using content identifiers associated with said user to automatically recognize content within said digital images; and
  - automatically transmitting over said communication network said first resolution images identified by content identifier to specified individuals.

4. Cancelled.

5. (Currently amended) A method for providing first resolution digital images to a user comprising the steps of:

obtaining instructions with respect to a user account;

receiving first resolution digital images from a wireless capture device via a communications network;

transmitting said first resolution digital images to a service provider, said service provider forwarding said first resolution digital images to a user computer after forming a copy of each of said first resolution digital images;

said service provider storing said copy of said first resolution digital image for future access by the user and/or authorized third parties;

said service provider using a content identifier associated with said user to automatically recognize content within said digital images; and

automatically transmitting image over a communication network said content information correlated to said first resolution digital image to a specified individual.

6. (Cancelled)

7. (Cancelled)

8. (Currently amended) A method according to claim 5 [[6]] wherein said copy comprises a resolution copy less than said first resolution image.

9. (Currently amended) A method according to claim 5 [[6]] wherein said wireless capture device comprises an electronic camera.

10. (Cancelled)

11. (Previously presented) A method according to claim 1 wherein said service provider either automatically or on request can look for

images to which an icon provided by a user has been applied and automatically forwarding the identified images to said user.

12. Cancelled.

13. Cancelled.

14. Cancelled.

15. Cancelled.

16. Cancelled.

17. Cancelled.

18. Cancelled.

19. Cancelled.

20. (Currently amended) A method for providing digital images of a first resolution to a user comprising the steps of:  
processing roll of film and digitizing images on said roll of film and forming said first resolution digital images;  
recognizing a content identifier on said roll of film by analyzing said digital images, said content identifier providing information or instructions;  
transmitting said first resolution digital images to a service provider over a communication network; said service provider forwarding said first resolution digital images to a computer of a recipient over said communication network after forming a copy of each of said first resolution digital images in accordance with said instructions;  
said service provider using content identifiers associated with said user to automatically recognize content within said digital images; and

automatically transmitting over said communication network said first resolution image is identified by said content identifier to a specified individual[[s]].

21. (Previously presented) A method for providing digital images of a first resolution to a user comprising the steps of:

processing roll of film and digitizing images on said roll of film and forming said first resolution digital images;

recognizing a content identifier said roll of film by analyzing said digital images, said content identifier providing information or instructions;

transmitting said first resolution digital images to a service provider over a communication network, said service provider forwarding said first resolution digital images to a computer of a recipient over said communication network after forming a copy of each of said first resolution digital images in accordance with said instruction; and

wherein said service provider either automatically or on request looks for images to which an icon provided by a user has been applied and automatically forward the identified images to said user.

22. (Previously presented) A method for providing first resolution digital images to a user comprising the steps of:

obtaining instructions with respect to a user account;

receiving first resolution digital images from a wireless capture device via a communications network;

transmitting said high resolution digital images to a service provider, said service provider forwarding said first resolution digital images to a user computer after forming a copy of each of said first resolution digital images; and

wherein said service provider storing high resolution images for an ordering period after which said high resolution images are automatically transferred to the user computer and said stored high resolution images are converted to low resolution images and added to the user's low resolution image collection.

23. (Previously presented) A method for providing first resolution digital images to a user comprising the steps of:

- obtaining instructions with respect to a user account;
- receiving first resolution digital images from a wireless capture device via a communications network;
- transmitting said first resolution digital images to a service provider, said service provider forwarding said first resolution digital images to a user computer after forming a copy of each of said first resolution digital images; and
- wherein said service provider either automatically or on request looks for images to which an icon provided by a user has been applied and automatically forward the identified images to said user.
